PROFESSIONAL EXPERIENCE

McKinsey & Company · São Paulo, Brazil

Engagement Manager (EM) · 2022 – Present

- Built and scaled McKinsey's GenAI capability program from 1 region to 3 regions over 18 months, leading 15+ contributors to train 150+ practitioners and seed 30+ downstream client engagements via curriculum redesign and a recurring capability forum.
- Led an AI-first PDLC redesign at a top-5 LATAM bank: 45% lead-time reduction in two priority squads, 6× A/B-testing throughput improvement, and ~R\$1B/month in unlocked credit-balance potential from improved time-to-market.
- Directed a 4-person team to identify and unlock ~US\$30–45M/year in margin expansion at a 4-country LATAM enterprise software firm, via go-to-market sales-motion and delivery operating-model redesign.
- Translated McKinsey's global transformation framework into a localized Agile blueprint at a Top-3 European insurer's Brazil operation, delivering 80% lead-time reduction and unlocking 40+ stalled IT-dependent initiatives over 6 months.
- Designed the customer-segmentation analytics for a Brazilian retail bank's loyalty redesign, projected to drive a 12-point uplift in primary-bank-relationship penetration over 24 months; segmentation model retained by the client's CRM team.
- Mentored 3 Business Analysts to first independent module ownership across two engagements; all three received above-average or distinction ratings in their next cycle.

Tech Corp · São Paulo, Brazil

Solution Consultant · 2020 – 2022

- Owned LATAM mid-market pre-sales for an enterprise software vendor, closing 8 enterprise deals across 12 financial-services and retail customers in 18 months.
- Designed and ran 25+ customer design-thinking workshops to translate operational pain points into solution architectures, building a pre-sales playbook later adopted as the team standard.

EDUCATION

Polytechnic School of the University of São Paulo (top-ranked engineering school in Brazil) · São Paulo, Brazil

BEng. Electrical Engineering · 2014 – 2019

- CNPq scientific initiation scholarship — thesis on machine learning for power-grid load forecasting; semester exchange at TU Delft (Netherlands, 2017); junior enterprise board member.
